NI Water

Chemicals Tender C013 Polyelectrolytes

Chemifloc (UK) Ltd has jointly been awarded the above tender by Northern Ireland Water to supply the SNF range of polyelectrolytes. SNF are the worlds largest producer of polyelectrolytes. They have achieved that position due to the range and quality of their products combined with competitive pricing. Chemifloc has been supplying Northern Ireland Water with Aluminium Sulfate, Ferric Sulfate and Ferric Aluminium Sulfate along with some polyelectrolytes for 25 years.

As part of its service to customers Chemifloc provides technical back-up from a team of experienced scientists. This includes jar-testing, field trialling and optimising Plant and Equipment. Additional technical back-up is available from SNF (UK) if required. Whether it is drinking water production or sewage treatment, Chemifloc has the expertise to help your performance.
